

As a condition of access, we require PIs to complete an annual survey including providing details of any publications produced as a result of access to Bede. We may use your information to generate a short case study, in which case, we will send a draft of it for your approval before it is published online.

Each publication produced as a result of research undertaken on the N8 CIR facility must quote the acknowledgement given below and contact: enquiries@n8cir.org.uk to give details of the publication.

"This work made use of the facilities of the N8 Centre of Excellence in Computationally Intensive Research (N8 CIR) provided and funded by the N8 research partnership and EPSRC (Grant No. EP/T022167/1)".

Your Details

Name

Job title

Email address

Institution

Please provide a link to your research page

If you would like to, please supply your social media accounts so we can follow you and help promote your work.

Your Bede Project

Bede Project number

Project collaborators (name and institution)

Who funds the project?

Project progress

Which academic years have you been using Bede (e.g. 2020-2025, 2023-24)?

What is the software being used in this research?

Project progress

Please provide an executive summary of your project

How has your research benefitted from using Bede?

Has using Bede meant you were able to apply for further research funding? How does it relate to your initial project?

Using other computing facilities

Did you need to use other tier-2 facilities as part of this project? What were they, and what were your reasons for using them?

Have you used Bede as a stepping stone to access larger (tier-1 or tier-0) computing facilities? If so, which?

Publications resulting from your research using Bede in the last two years.

Please copy from your preferred reference system and include the DOI where possible.

Publications

In press

Please upload a profile picture for our web page, key images of your research that you'd like to add to the case study (including a caption) and pdfs of your publications for our records.
